Kami launches KamiTee High Fashion Undershirts for Women who Perspire

American Canyon, CA (Napa County) – (July 7, 2008) – Kami Co. announced today that it will introduce its new KamiTee high fashion undershirts for active women who perspire. Motivated by active women’s top complaint --perspiring and soiling their blouses and sweaters--the company designed variety of women’s high fashion undershirts that can be worn under their blouses and sweaters. The high fashion undershirts absorb moisture away from the woman’s body, yet protect her clothing.

KamiTee products are high fashion undershirts for the active woman. The women who wear the KamiTee want to save on their dry cleaning costs yet maintain the versatility of being able to wear their low cut tops and sweaters. The KamiTee wicks the moisture away from the woman’s body while protecting her clothes from stains.

Currently available online at (www.kamitee.com), the KamiTee woman’s high fashion undershirt features soft, breathable cotton for more absorbency and spandex purposely designed for a better fit. The shirts feature specially designed Kamishield underarm pads that help protect women’s garments against perspiration stains.

“KamiTee: Feminine like a *Camisole*, Fits like a *Tee*”... is the motto for KamiTee because the shirt was inspired to be manufactured of soft material in part like a camisole (**Cam**) yet absorbent and breathable like a baby Teeshirt (**Tee**) hence the product’s name—KamiTee.

Hyperhydrosis

“Many women have come to us because they sweat a lot and they want to protect their clothing . Either they are active at work, they experience hot flashes due to menopause, they have Hyperhydrosis and sweat heavily, or they just want to reduce or save on drycleaning costs and don’t want to send their sweaters to the cleaners as often. We have found the solution and have let the customers know that when women with Hyperhydrosis wear the Kamitee their condition is relieved or their problem is solved” says Kami CEO.
